

# Early Intervention Resources by Centre Pediatrics

Massachusetts Early Intervention (EI) is a program for infants and toddlers (birth to 3 years old) who have developmental delays or are at risk of a developmental delay. EI Services are designed to help support families and caregivers, and to enhance the development and learning of infants and toddlers through individualized, developmentally appropriate activities within the child's and family's everyday life experiences. Most health insurances cover EI services. There are no copayments or deductibles or other costs to the family. The Massachusetts Department of Public Health, MassHealth and private insurance cover EI services. For more information, visit [mass.gov/orgs/early-intervention-division](http://mass.gov/orgs/early-intervention-division).
