

Lactation Information and Resources Recommended by Centre Pediatrics

Lactation Consultants are healthcare professionals with specialized knowledge and clinical expertise in breastfeeding and human lactation. These consultants are all IBCLC (International Board Certified Lactation Consultants), which means they have to document many hours of experience in counseling nursing mothers as well as formal education coursework in lactation management, counseling, and pharmacology. Lactation consultants are a good choice if you need one on one attention with breastfeeding or if you would like an in-home lactation visit. All of our recommended lactation consultants communicate with Centre Pediatrics via phone or fax with updates on the visits.

Please check to see if your lactation visit is covered by your insurance company. Thanks to the *Affordable Care Act*, many insurance companies are now covering these visits as well as breast pumps.
